Make it safer for your gear, your room and even for you.

Use Mimic GO to notify you if anyone tampers with your gear when you're at a cafe, a gym, or when you're traveling. Hang it on your dorm door, place it in your home office or in your garage to alert you if someone steps in.

Keep it Safe with Mimic GO

Get security for your gear and for yourself!
Wherever and whenever you want it!
However you want it!

Secure your backpack, valuables,
professional gear or computers when
traveling. Make your room, home office,
and garage safer, even when you're home!

Use Mimic GO to keep your belongings safe.

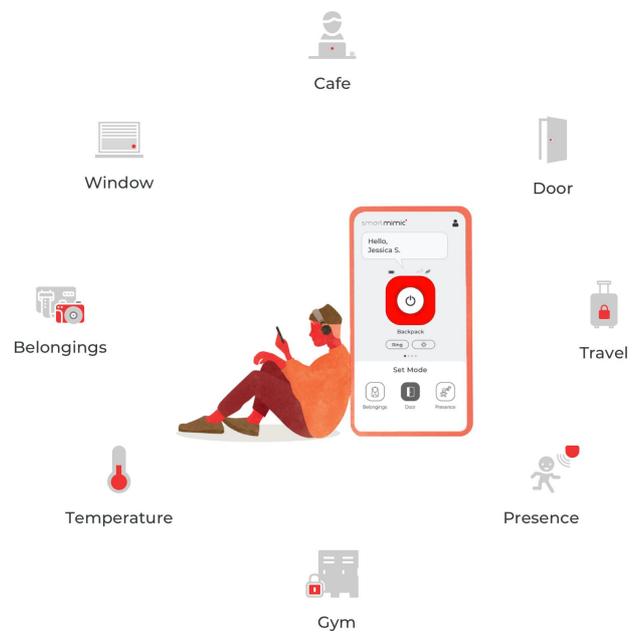

Whether you're in transit, sitting at a cafe, working out at the gym, spending time at work, or traveling, Mimic GO can keep tabs on your valuable gear. Just place Mimic GO inside your bag or on your belongings. Use the free app to turn it on, and Mimic GO will send an instant notification to your app if your gear is shifted or moved so that you can respond right away. You can even set it to sound an alarm and deter anyone while alerting others.

The Smart Mimic App works with Mimic GO to help make it safer for you, anytime, anywhere!

Use the included Mimic App to easily configure your Mimic GO for the most common scenarios. With just three taps from the app, Mimic GO communicates with your phone or smartwatch via the Mimic app. Customize your experience by adjusting the alarm, light, and mode selections. Decide how you want to get notified by choosing your notification settings.

With Mimic GO, you can secure more than just a bag or laptop! Secure golf bags, bikes, camping gear, DSLR cameras, and even musical instruments. You can even secure your garage from unauthorized entries. Mimic GO is there for you even when you need to keep the teenagers away from the wine cabinet.

Just set the "Belongings Mode" in your app.

Mimic GO can make your space safer.

Use Mimic GO to make any space safer, whether it is a shared living space like an Airbnb, your dorm room, or a shared workspace. You can even use it to secure spaces your home security just doesn't cover adequately, like the tool shed or garage. Just place Mimic GO facing the area you want to monitor. Once armed, Mimic GO will send a notification to your app if any unexpected or unwanted person intrudes in your space. You can even set it to sound an alarm to alert others and warn the intruders off.

Just set the "Presence Mode" in your app.

Mimic GO can make it safer for you even when you're traveling.

Use Mimic GO as your personal, traveling watchdog! Mimic GO can be put on alert while you sleep, whether you're at home or on the road. Using the included reusable sticky pad, you can place Mimic GO on any movable smooth surface-like a hotel room door. Arm it as you wish, and rest peacefully while Mimic GO stays on guard all night long.

Just set the "Door Mode" in your app.

Mimic GO stays connected to your phone even when other Bluetooth devices give up! In fact, Mimic GO stays connected to you even when Bluetooth doesn't!

Using the advanced Mimic Fi technology, Mimic GO can stay in touch with your phone whether you are in Bluetooth range or not. Mimic GO will automatically seek other networks to stay in touch with you even if your phone loses Bluetooth contact with your Mimic GO. We are doing this without the need for any SIM cards or cell phone fees.

Check for coverage in the US and worldwide [here](#).

Use Mimic GO to give peace of mind to yourself and the people you care about!

Worried about the safety of your kids in a dorm or about the seniors you care for? Mimic GO helps you keep tabs on them without invading their privacy. At Smart Mimic we are constantly working on new ways to make it safer for you, the people you care about, and the things you care about.

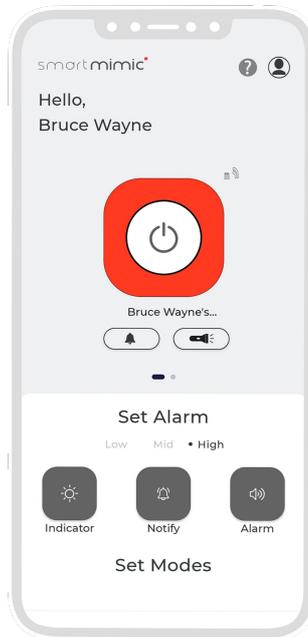

WITH MIMIC GO YOU HAVE YOUR SAFETY AND PRIVACY TOO!

Mimic GO does not use cameras, microphones or GPS to keep things safe. Mimic GO uses advanced technology to makes sense of the real world and keep you safe without needing to know what you are saying, doing or writing.

Get Set Up in 3 Easy Steps!

1. Unbox the Mimic GO. Place it where you need to secure.

2. Use app to select the mode you want.

3. Activate the mode and keep it safe!
